

Make your own James Webb Space Telescope

Step 1

Fold paper in half along the line (with the print on the outside.

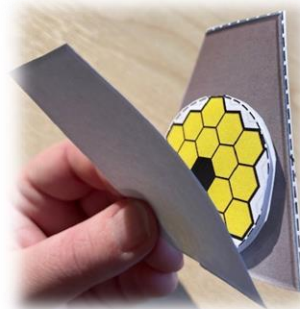

Cut around dotted outline

Make sure it's straight so that your pattern lines up on both sides!

Step 3

Fold the silver sunshield (pot) where it joins the mirrors (flower) on both sides, so the printed sides are together.

Fold along this line

Step 2

Carefully cut around the dotted outline

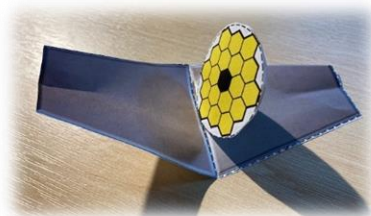

Step 4

Use a little bit of sticky tape along the fold you just made.

Unfold the sunshield and you have your own Webb telescope!

James Webb  Space Telescope
